

Comp 584 Proj 1 Report

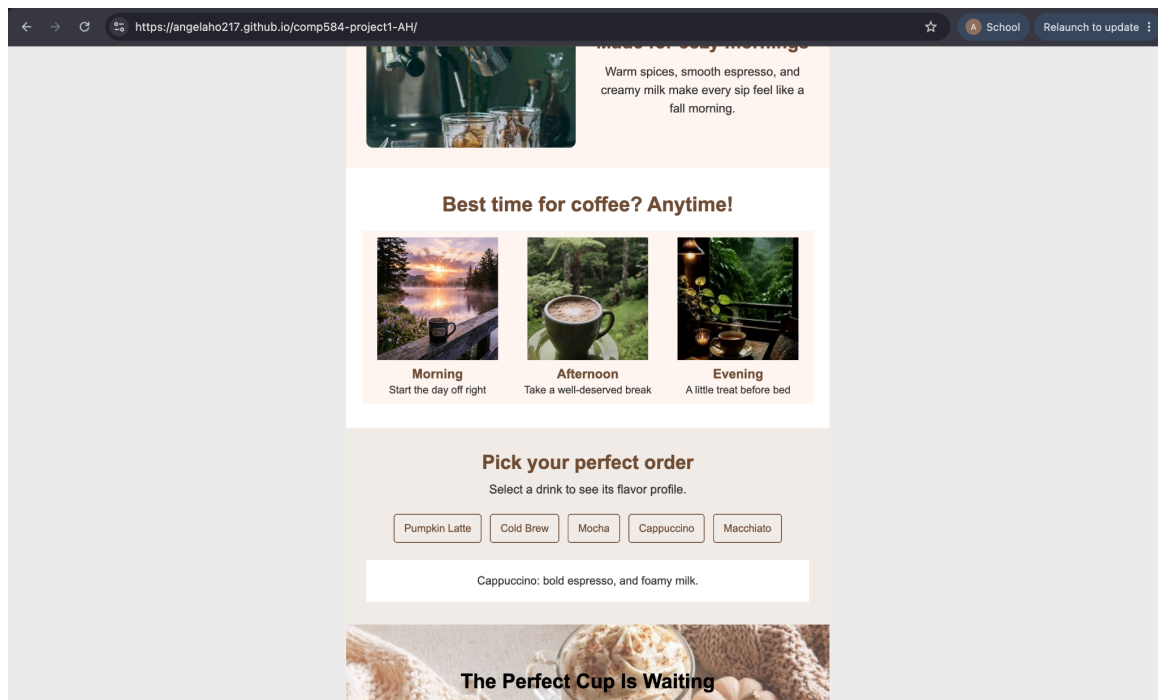

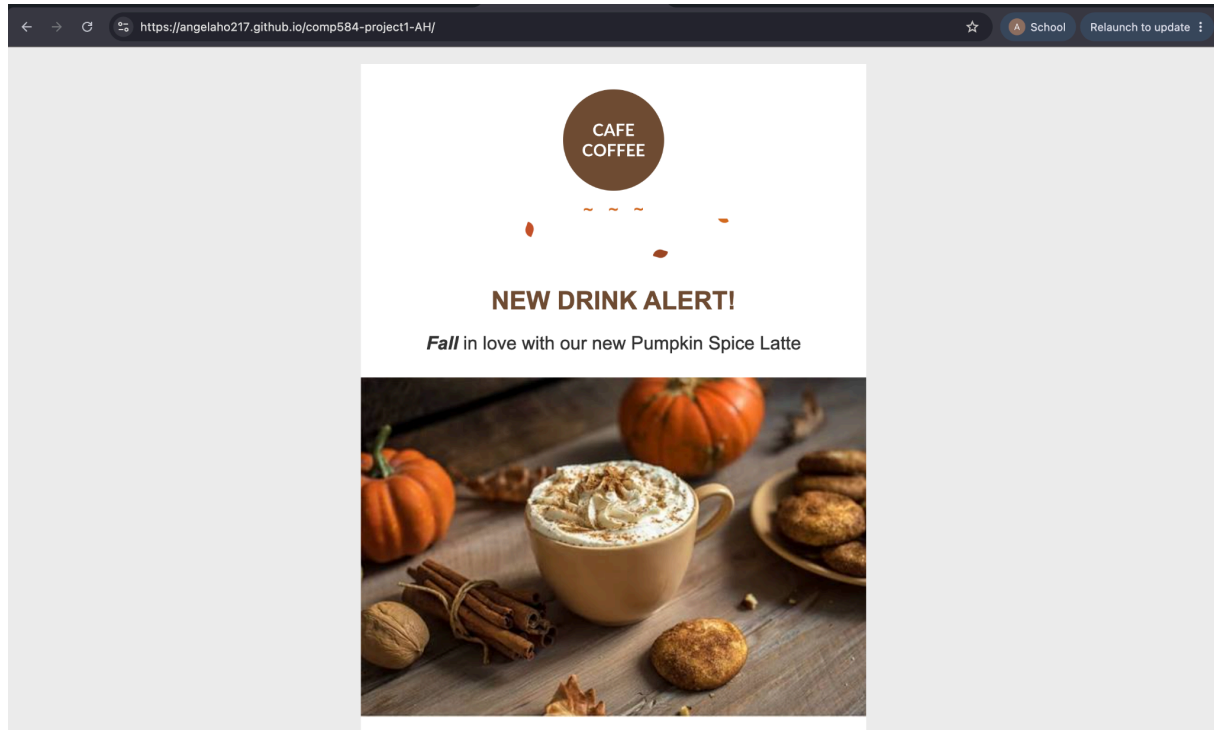

Everything works fine on Gmail except for the animations and radio buttons and 1 of the background pictures.

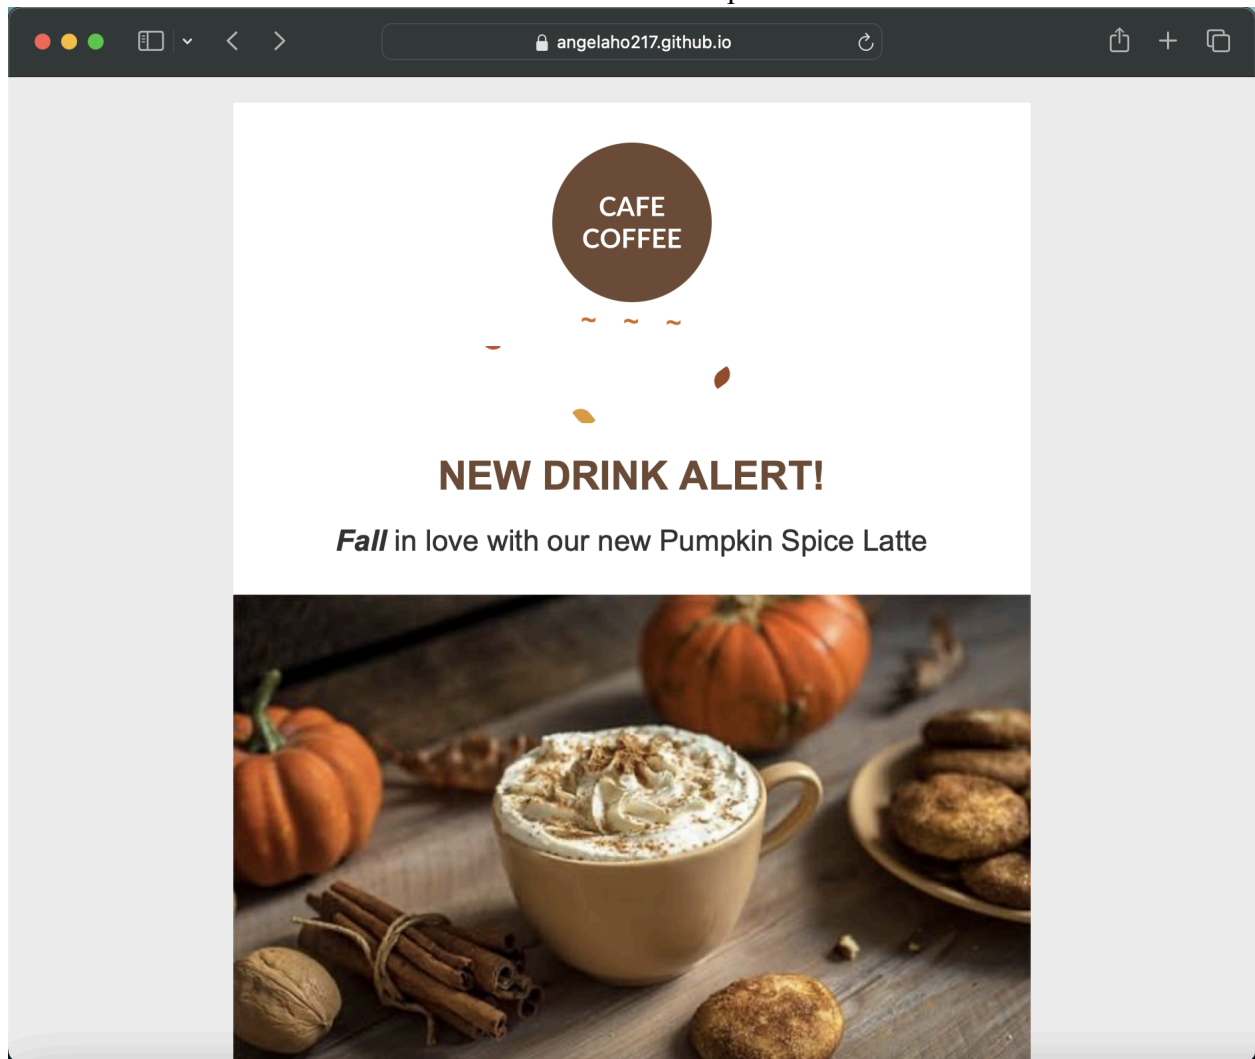

Same things that didn't work on Gmail, didn't work on outlook either. In addition, the view coffee menu looks wrong but still functional.

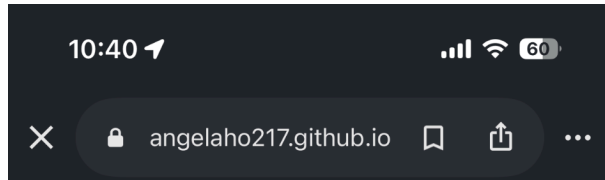

Everything works fine on Chrome desktop. All the layout, images, button, animations, and drink selector seemed to work as intended.

Also works well with safari. No notable differences compared to chrome.

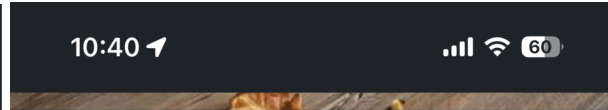

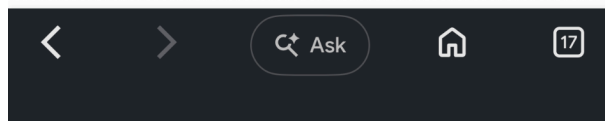

Seems to work well on mobile chrome and safari except one of the images is off centered. All the buttons and animations and headings/labels are still fine though.

NEW DRINK ALERT!

Fall in love with our new Pumpkin Spice Latte

Start your day with a delicious pumpkin spice latte from Cafe Coffee. Our drinks are made with freshly brewed coffee and organic milk.

Use the coupon code **COFFEE10** to receive 10% off your order this week!

Made for cozy mornings

Warm spices, smooth espresso, and creamy milk make every sip feel like a fall morning.

Best time for coffee? Anytime!
