

Comp 584 HW3 Accessibility Report

Tool 1: Chrome Lighthouse

Pros: built into chrome no download required, easy to use, provides score and suggestions for improvement, can test on different websites

Cons: results can differ depending on internet speed, device performance or server performance, high score doesn't always mean fully accessible, some recs may be difficult for beginners, doesn't test every accessibility issue, only websites

Tool 2: VoiceOver

Pros: built into mac no download required, helps with users who are visually impaired or blind, can identify problems with headings, links, buttons, images, etc. useful for checking practicality for users, tests websites through keyboards and screen reader interaction

Cons: takes time to learn keyboard commands, testing is slower than lighthouse, results depends on user's settings, may miss performance issues
